   --[no-]separate-git-dir <gitdir>
                        separate git dir from working tree
   --[no-]ref-format <format>
                        specify the reference format to use
   -c, --[no-]config <key=value>
                        set config inside the new repository
   --[no-]server-option <server-specific>
                        option to transmit
   -4, --ipv4           use IPv4 addresses only
   -6, --ipv6           use IPv6 addresses only
   --[no-]filter <args>  object filtering
   --[no-]also-filter-submodules
                        apply partial clone filters to submodules
   --[no-]remote-submodules
                        any cloned submodules will use their remote-tracking branch
   --[no-]sparse        initialize sparse-checkout file to include only files at root
   --[no-]bundle-uri <uri>
                        a URI for downloading bundles before fetching from origin remote
